Aquasun 2 Digital Solar Controllers

The AquaSun 2 incorporates sophisticated technology with the simplest of operation!

AquaSun2

Dontek Solar Controllers warm your pool by accurately controlling the delivery of the cooler pool water to your heated roof collector for your ultimate swimming enjoyment.

Multi-Mode

The Aquasun2 controller, while simple in operation has various Modes of Operation. These include, the default Summer Mode and a Winter Mode for pump and collector maintenance during the off season. Tropical Mode for Australian Northern Regions to help cool overheated pools and spas, and a Manual Mode.

Sophisticated and Reliable

The Aquasun2 controller uses auto sampling, with the highest accuracy calibration less digital thermostats and sophisticated algorithms to ensure your solar system starts at exactly the right time for maximum heat gains no matter the weather.

Product Features

Simple Up, Down and Select Button
Easy to use - Set and Forget

Auto Sampling
Ensures your pool is getting maximum heat gain

Heavy Duty 40Amp Contacts
Long Life pump switch

Large LCD display
Easy to read, even in direct sun light
